

Full-Stack Software Development Engineer

Job ID: 955395 | Amazon.com Services LLC

Bewerben Sie sich noch heute

BESCHREIBUNG

Amazon Lab126 is an inventive research and development company that designs and engineers high-profile consumer electronics. Lab126 began in 2004 as a subsidiary of Amazon.com, Inc., originally creating the best-selling Kindle family of products. Since then, we have produced groundbreaking devices like Fire tablets, Fire TV and Amazon Echo. What will you help us create?

The Role:

Are you passionate about developing simple, elegant solutions to complex problems? Do you enjoy working closely with customers and delighting them with amazing user experiences?

As a Software Development Engineer in the Product Data Intelligence team, you will help drive one of our most important software development initiatives.

You will have a unique opportunity to work in a solution stack that extends all the way from complex back-end data through web services to highly usable web-based user interfaces. You will be able to directly shape system design, development methodologies and implementation technologies.

GRUNDQUALIFIKATIONEN

- 2+ years of non-internship professional software development experience
- Programming experience with at least one modern language such as Java, C++, or C# including object-oriented design
- 1+ years of experience contributing to the architecture and design (architecture, design patterns, reliability and scaling) of new and current systems.
- Bachelor's degree in Computer Science or related field (or 4+ additional years work experience)
- 3+ years relevant professional development experience, preferably in a LINUX environment
- Experience in HTML, CSS, Javascript, and a backend language such as Java.
- Experience with distributed (multi-tiered) systems, algorithms, and relational databases such as MYSQL.
- Skills in data structures, algorithms and object oriented design
- History of delivering production systems/services

BEVORZUGTE QUALIFIKATIONEN

- Master's degree in Computer Science
- 3+ years professional software development experience
- Proficiency in Java
- Experience developing complex single page applications
- Passionate about UX and UI performance
- Experience implementing intuitive user interfaces for complex tasks
- Familiarity with AWS
- Knowledge of and expertise in software engineering best practices for the full software development life cycle, including

requirements gathering, design, coding standards, code reviews, source control management, build processes, testing, and operations

- Ability to communicate effectively with users, technical teams, and management
- Strong problem solving skills
